

Transaction Menu: Explanation of Headers

Site	Tran	Card	Jbr	Acct	Qty	Date	Time	Auth	Pump	Product	Card Input	Vehicle	Odometer	Misc Entry	Received
------	------	------	-----	------	-----	------	------	------	------	---------	------------	---------	----------	------------	----------

Figure 1: 16 Headers of the Transaction Menu

There are typically 16 headers that the transactions will display in the Transaction Menu.

- **Site:** The number that is assigned to the fuel station by the system
- **Tran:** The number of the transaction that is assigned by the fuel station
- **Card:** The last 7 digits of the card
- **Jbr:** The number that is associated with your fuel card issuer
- **Acct:** The number that is associated with the account a card is under
- **Qty:** The number of gallons of fuel product that was purchased
- **Date:** The local day, month, and year of the fuel station that a transaction took place
- **Time:** The local time of the fuel station that a transaction took place
- **Auth:** 6-digit number that is generated by the fuel station assigned to a unique transaction
- **Pump:** The pump number that is assigned by the fuel station
- **Product:** The product code that is assigned to the fuel product
- **Card Input:** The way in which the card was read at the pump. “2” means it was swiped and “S” means that it was a cardless transaction.
- **Vehicle:** The vehicle number that is associated with the vehicle at the time of transaction
- **Odometer:** The odometer reading that the user entered at the time of transaction
- **Misc Entry:** A deprecated function.
- **Received:** The year, month, day, hour, minute, and second that the transaction ended, displayed in a YYYYMMDDHHMMSS format
